CILogon Project Goal

- Enable campus logon to CyberInfrastructure (CI)
 - Use researchers' existing security credentials at their home institution
 - Ease credential management for researchers and CI providers

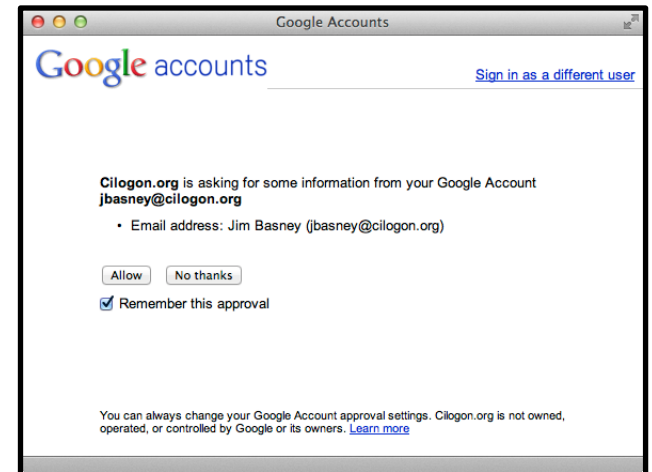

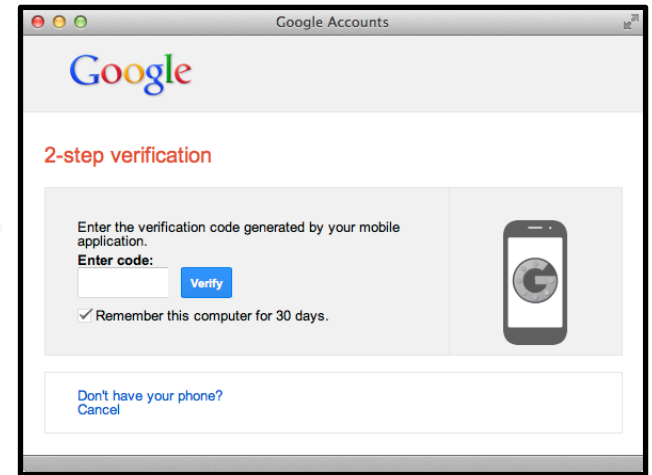

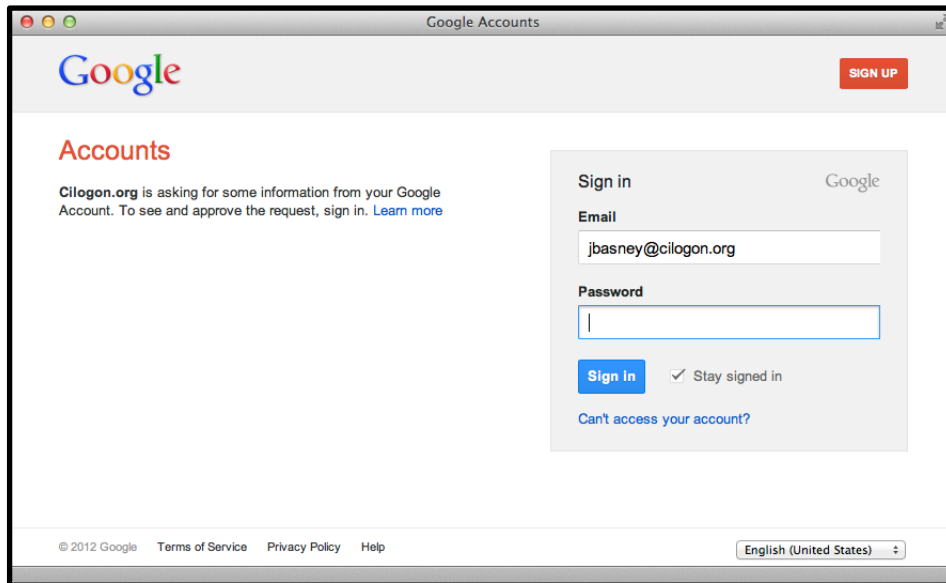

CILogon Service

(<https://cilogon.org>)

- Delivers certificates to desktop, browser, and portals
- Available certificate lifetimes: from 1 hour to 13 months
- Supports InCommon and OpenID authentication
- See also:

The screenshot shows a web browser window titled "Welcome To The CILogon Service". The page has a green header with the CILogon logo and the text "CILogon Service". Below the header, there is a "Select An Identity Provider:" section. This section contains a list box with the following options: Emory University, Florida International University, Georgetown University, and Google. Below the list box is a "Search:" input field and a "Remember this selection:" checkbox. A green "Log On" button is positioned below the checkbox. At the bottom of the "Select An Identity Provider:" section, there is a small text line: "By selecting 'Log On', you agree to [CILogon's privacy policy](#)." In the top right corner of the main content area, there is a "Show Help" button. At the bottom of the page, there is a footer with the text: "For questions about this site, please see the [FAQs](#) or send email to help@cilogon.org. Know your responsibilities for using the CILogon Service. See [acknowledgements](#) of support for this site." A blue question mark icon is located in the bottom right corner of the footer.

Why OpenID?

- Support users w/o institutional logins
 - Home institution not (yet) in InCommon federation
 - Home institution not (yet) releasing attributes to CILogon
- Use existing Google ID rather than signing up for new ProtectNetwork ID
- US ICAM LOA 1 certified OpenID providers
 - Google, PayPal, and VeriSign

DataONE Users - Home Institutions (Jan 2012)

CILogon Users Per Identity Provider (December 2012)

Google
IDs are
popular!

Thanks!
